

# Make publishing easier.

Gain insight into the Canadian book market, stay connected to the supply chain, and learn how to reach more readers.

With **BNC SalesData**, you can conduct cost-effective market research and analysis, plan your print runs based on historical data, and access valuable supply-chain data like on-hand and on-order numbers. Plus, you'll benefit from free research, including all-market sales reports, studies on the sales impact of literary awards, and consumer surveys.

**BNC LibraryData** collects weekly circulation data from libraries across Canada to help libraries, library suppliers, and publishers investigate trends, identify collection opportunities, and more. When used with SalesData, publishers can compare circulation data to the retail market, produce overall 'Popular Books' lists, and examine trends by genre, regions, authors, and more.

**BNC CataList** allows you to easily create digital catalogues using your own ONIX metadata pulled in from BNC BiblioShare. You can flag late-season drop-in titles and add vital marketing content like interior images, excerpts, and video trailers. Reps and publicists can share custom catalogues and notes tailored to their accounts and contacts, which can be exported to customizable Excel sheets and PDFs. Plus, listing your forthcoming books in CataList makes them eligible for the **Loan Stars** readers' advisory program.

**BNC BiblioShare** provides quality-assured metadata for the Canadian book supply chain. Create your free account to submit your book metadata using ONIX. Once it's in BiblioShare's vast bibliographic database, websites like 49th Shelf can use it to help promote your titles. And once your data is in BiblioShare, you can create catalogues in BNC CataList.

**Pubnet EDI** streamlines ordering and invoicing, and improves communication with retailers, all for a low, flat-rate annual fee. You can use the POW web interface or use your own system directly with Pubnet.

Stay abreast of evolving best practices for bibliographic data and changes in the supply chain for print and digital books with our up-to-date **Standards** resources, including free webinars and online guides.
